Saudi Exports

This section aims to support the Saudi Exports Program through the provision of the information.

Saudi Arabia has been working for a long while on diversifying the sources of national income through several means. Export is one of the significant national income sources, as it is an effective and growing sector. Thus, the importance of this sector stems from its great capability to create new job opportunities for the youth, and to attract more national and foreign private investments, which will consequently result in real and constant growth rates. Therefore, the Cabinet decision was made to establish an authority for developing Saudi exports, to be an independent institutional economic entity, whose main task is to find solutions for improving the competitiveness of Saudi exports, and control the trade balance deficit after the Saudi non-oil exports exceeded 150 billion riyals throughout the past two years.
