

Summary

Real Economy: Whilst POS transactions increased 18 percent, the non-oil PMI index declined further. Meanwhile, non-oil exports in March increased by 1.8 percent year-on-year.

Government Finance: The net monthly change to government accounts with SAMA rose by SR7 billion month-on-month in April, mainly coming from a similar rise in government deposits.

Q1 Budget Statement: The latest Q1 2018 budget performance report by the Ministry of Finance (MoF) showed that the fiscal deficit increased by 31 percent year-on-year, to SR34 billion.

SAMA foreign Reserve Assets: SAMA FX reserves rose by \$13.2 billion month-on-month to stand at \$506.6 billion in April, marking its largest monthly increase since October 2013.

Money Supply: M3 was almost flat in April, showing its slowest annual rise in five months, by 0.2 percent. Among money supply aggregates, currency in circulation (M0) showed the highest rise.

Bank Deposits: Bank deposits declined by 0.5 percent year-on-year in April, mainly due to government deposits, which declined by 6.4 percent year-on-year, marking the largest decline in a year.

Interest Rates: Excess liquidity continued to decline in the banking system for the second month in a row in April, likely leading SAIBOR to continue its rise in May, and widening the SAIBOR/LIBOR spread.

Inflation: Prices rose in April by 2.6 percent year-on-year. 'Rentals for housing' continued to decline, falling 1.6 percent year-on-year.

Umrah: The number of Umrah visitors from outside the Kingdom increased in 2017 to reach 6.5 million visitors.

Oil-Global: Brent oil rose to above \$80 pb at one point during the month, but dropped in the last week of the month following Saudi Arabia and Russia's comments on the possibility of raising oil output.

Oil-Regional: Saudi oil production remained unchanged month-on-month in April, with year-to-date output averaging 10 mbpd.

Exchange Rates: Political developments in Italy and capital outflows from emerging market economies, added to the dollar's strength during the month.

Stock Market: Profit taking in anticipation of a quieter trading period during Ramadan contributed to a monthly drop in TASI in May, although the index was up strongly on the first day of trading in June.

Sectorial performance: Most sectors ended the month with a significant decline, in line with TASI's performance during May.

Q1 Listed Company Results: Q1 2018 listed company net-income totaled SR25.5 billion resulting in a 17 percent decline year-on-year.

Real Economy

Economic data for April showed mixed performance. Whilst POS transactions increased by 18 percent and ATM withdrawals rose by 5.5 percent, year-on-year, the non-oil PMI index declined further to a new record low. In addition, non-oil exports in March increased by 1.8 percent year-on-year, marking its lowest yearly rise in six months, following a significant rise in February.

POS transactions increased by 18 percent and ATM withdrawals rose by 5.5 percent in April, year-on-year.

Indicators of Consumer Spending
(year-on-year change)

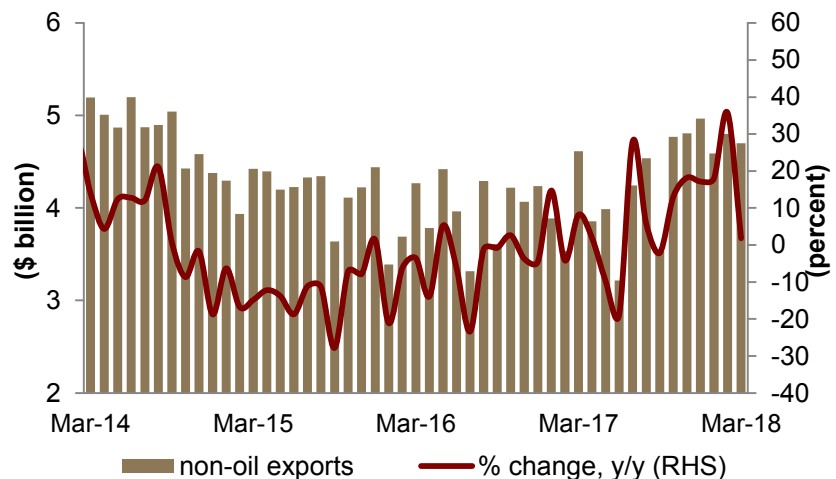

The non-oil PMI index, whilst still in expansionary mode, declined further to a new record low, its lowest in nine years.

Purchasing Managers' Index

In March, non-oil exports increased by 1.8 percent year-on-year, supported by higher exports in petrochemicals, which rose by 16 percent year-on-year, and metals, which were 33 percent higher year-on-year. Lower growth rates in March seem to be due to a decline in transport equipment exports by 58 percent year-on-year in March.

Non-oil Exports
(year-on-year change)

Government Finance

The net monthly change to government accounts with SAMA rose by SR7 billion month-on-month in April, mainly coming from a similar rise in government deposits with SAMA during the month. At the same time, domestic bank holdings of government bonds increased by SR5.2 billion in April, following a domestic sukuk issuance during the month.

The net monthly change to government accounts with SAMA rose by SR7 billion month-on-month in April...

Net Change to Government Accounts with SAMA

Q1 Budget Statement

The latest Q1 2018 budget performance report by the Ministry of Finance (MoF) showed that due to an increase in year-on-year expenditure, by 18 percent, at a faster rate than revenue, 15 percent, the fiscal deficit increased by 31 percent year-on-year, to SR34 billion. That said, the first quarter's deficit only accounted for 18 percent of the expected SR195 billion deficit for the whole year.

The fiscal deficit increased by 31 percent year-on-year, to SR34 billion.

Q1 Fiscal Deficit
(SR billion)

Yearly Change in Government Revenue
(SR billion)

Non-oil revenue was almost wholly behind the growth in total government revenue, rising by 63 percent year-on-year as a switch to quarterly dividends meant that government oil revenue was up only 2 percent year-on-year, with a part of Q1 contributions expected to be received in the Q2.

Yearly Change in Government Expenditure
(SR billion)

Expenditure rose as a result of higher 'Social Benefits' related to the Citizen's Account, but also due to a rise in 'Compensation of Employees', following a royal decree at the start of 2018 which compensated civil servants for higher living costs.

SAMA Foreign Reserve Assets

SAMA FX reserves rose by \$13.2 billion month-on-month to stand at \$506.6 billion in April, marking the largest monthly increase since October 2013. A breakdown of FX reserves shows the recent increase came from monthly rises in foreign securities and bank deposits during the month.

SAMA FX reserves rose by \$13.2 billion month-on-month to stand at \$506.6 billion in April...

SAMA Total Foreign Reserve Assets

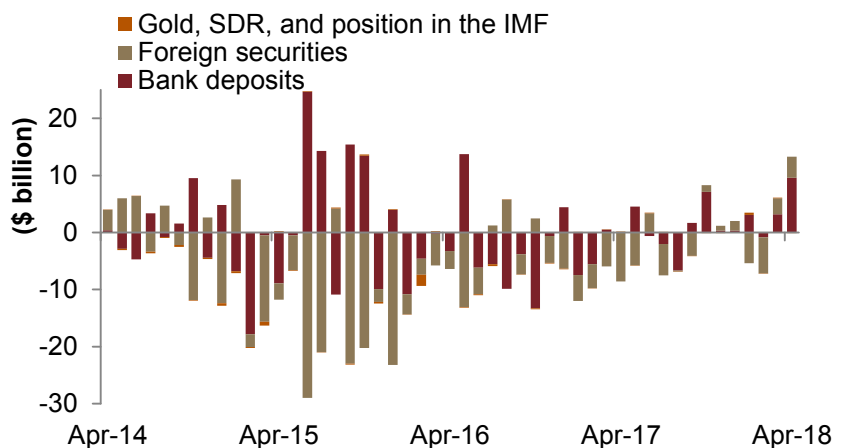

...marking the largest monthly increase since October 2013.

SAMA Foreign Reserve Assets

The recent increase came especially from bank deposits, which saw a rise by \$9.6 billion in April, the largest monthly increase since May 2016.

Breakdown of SAMA Foreign Reserve Assets
(month-on-month change)

Money Supply

Broad measure of money supply (M3) was almost flat in April, showing its slowest annual rise in five months, by 0.2 percent. Out of all the money supply aggregates (M0, M1, M2, M3), currency in circulation (M0) showed the highest rise in April, growing by 7 percent year-on-year, marking the highest growth since December 2015. Latest weekly M3 data shows declining money supply in May.

M3 was almost flat in April, showing the slowest annual rise in five months, by 0.2 percent.

Out of all the money supply aggregates, the narrowest money supply aggregate (M0), which measures currency in circulation, showed the highest rise in April, growing by 7 percent year-on-year.

However, latest weekly M3 data show declining money supply in May.

Bank Deposits

Bank deposits declined by 0.5 percent year-on-year in April, mainly due to government deposits, which declined by 6.4 percent year-on-year, marking the largest decline in a year. Meanwhile, private deposits rose by 1.5 percent year-on-year, as private time and saving deposits saw the first rise in nine months.

Bank deposits declined by 0.5 percent year-on-year in April. The loan to deposit ratio fell to 79 percent, below its 2017 average of 82 percent.

Whilst private deposits rose by 1.5 percent year-on-year, government deposits declined by 6.4 percent year-on-year, marking the largest decline in a year.

Private saving deposits saw the first rise in nine months, increasing by 2 percent year-on-year in April. We believe that SAMA's repo rate rise by 25 basis points in March has encouraged more savings, especially as more repo rises are expected during the year.

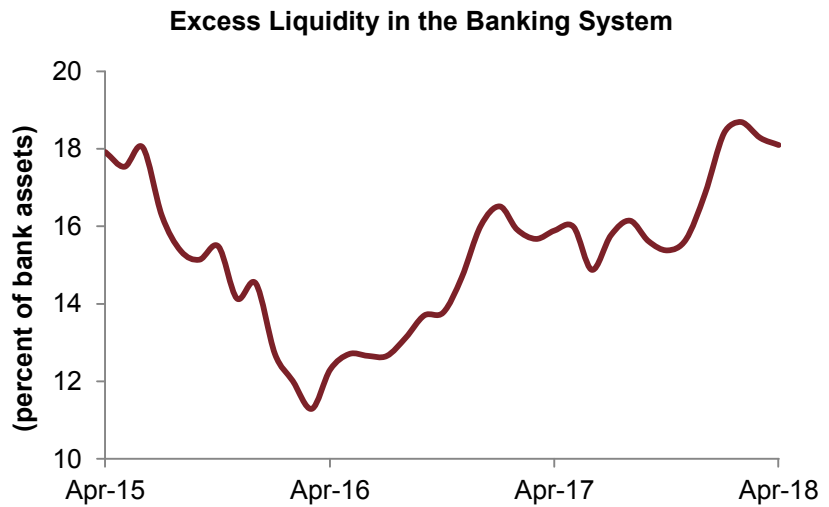

Interest Rates

Government deposits were down marginally during April, as an increase in quasi and demand deposits was equaled with a decline in time and savings deposits. Excess liquidity continued to decline in the banking system for the second month in a row in April, likely leading to SAIBOR continuing its rise in May, and widening the SAIBOR/LIBOR spread.

Government deposits were down marginally during April, declining by 0.8 percent year-on-year.

...likely leading to SAIBOR continuing its rise during May, and widening the SAIBOR/LIBOR spread.

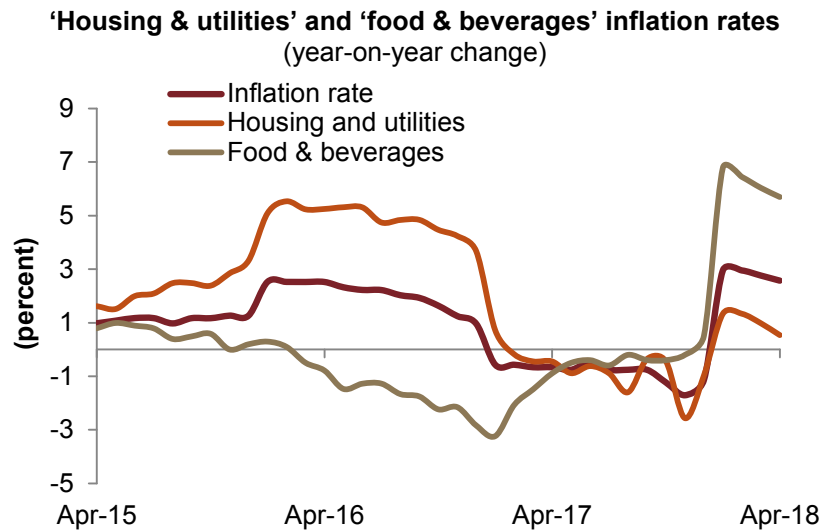

Inflation

Prices rose in April by 2.6 percent year-on-year, but declined by 0.2 percent month-on-month. 'Food and beverages' prices rose by 5.7 percent, and 'housing and utilities' rose by 0.5 percent, year-on-year. However, 'rentals for housing' continued to decline, falling by 1 percent month-on-month, and -1.6 percent year-on-year during April, marking the largest yearly decline since July 2017.

Prices rose in April by 2.6 percent year-on-year, but declined by 0.2 percent month-on-month.

'Food & beverages' prices rose by 5.7 percent year-on-year, but declined by 0.9 percent month-on-month.

'Housing & utilities' rose by 0.5 percent year-on-year, but declined by 0.3 percent month-on-month, affected by the slowdown in 'rentals for housing' which fell by 1 percent month-on-month, and -1.6 percent year-on-year in April.

Umrah

The number of Umrah visitors from outside the Kingdom increased in 1438-Hijri (2016-2017) by 2.2 percent, reaching 6.5 million visitors. The NTP 2020 target for Umrah visitors from outside the Kingdom is 15 million visitors, whilst the Vision 2030 aims for 30 million. Most visitors, on average, stayed for two weeks. Meanwhile, the number of local Umrah visitors declined to 12.5 million visitors from 12.7 million visitors in 1437-Hijri (2015-2016).

The number of Umrah visitors from outside the Kingdom increased by 2.2 percent in 1438-H (2016-2017), reaching 6.5 million visitors.

Umrah Visitors from Inside the Kingdom

Meanwhile, the number of local Umrah visitors declined to 12.5 million visitors in 1438-H (2016-2017), from 12.7 million visitors in 1437-H (2015-2016).

Oil - Global

Brent oil prices rose by 8 percent and WTI prices by 6 percent month-on-month in May following the US's decision to reapply sanctions on Iran. Although this led to Brent oil to rise to above \$80 pb at one point during the month, prices dropped marginally in the last week of the month following Saudi Arabia and Russia's comments on the possibility of raising oil output to help ease prices.

Oil prices were up on a monthly basis as the US reapplied sanctions on Iran...

...triggering concerns that this could lead to a sizable drop in Iranian oil supply, similar to the pattern seen in 2013-16.

However, following Saudi Arabia and Russia's comments on the possibility of raising oil output, by up to 1 mbpd, oil prices pulled back towards the end of May. That said, based on current global oil demand supply projections, oil markets would still likely remain in deficit in H2 2018 even if an additional 1 mbpd of oil supply came on-line.

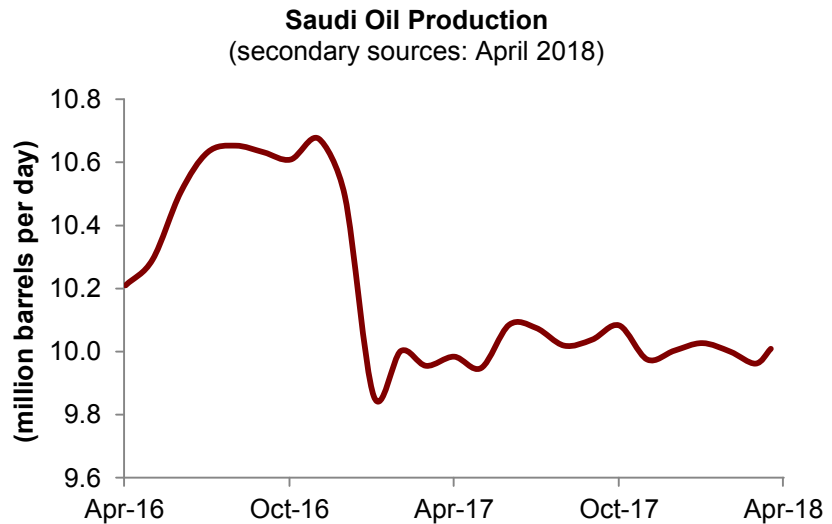

Oil - Regional

Saudi crude oil production remained unchanged month-on-month in April, with year-to-date output averaging 10 mbpd. Meanwhile, latest available official data points to minimum change in Saudi oil exports whilst unofficial data for April and May also shows limited change to oil exports.

Saudi crude oil production remains around 10 mbpd...

...with oil exports steady at around 7 mbpd in March...

...and expected to remain the 7 mbpd mark for April and May. Beyond then, rising seasonal summer demand for crude oil in electricity generation could result in some declines in Saudi crude oil exports.

Exchange Rates

Expectations of US interest rate tightening during 2018 and 2019 has been pushing the dollar up since mid-April. Whilst declines were seen in most currencies, capital outflows from many emerging markets led to declines in such countries' currencies. The US dollar was further strengthened by political developments in Italy, which prompted some investors to move into safe haven assets.

Capital outflow from a number of emerging market countries and into the US resulted in dollar strength. The dollar also benefitted for investors seeking safe haven assets...

Monthly Gain/Loss Against US Dollar
(May 2018)

...due to political developments in Italy, which also pushed the euro down.

Euro/US Dollar

Meanwhile, weaker than previously expected economic growth expectations and concerns over Brexit negotiations saw the UK pound continue to decline during May.

GBP/US Dollar

Stock Market

The Saudi Stock Market declined by 1 percent month-on-month in May. As is normally the case in the run up to, and in the initial weeks of, Ramadan, investor profit taking in anticipation of quieter trading period contributed to the monthly drop. In fact, this trend was seen across the region, with TASI's performance in line with other Gulf markets.

Q1 Listed Company Results

Q1 2018 listed company results, reported under International Financial Reporting Standards (IFRS), were down on a yearly basis but up on a quarterly basis. Although banks saw higher yearly profits, a decline in utilities' profits limited the upside in Q1. Banks and Materials saw their contribution to overall listed company profitability rise during the quarter.

Q1 2018 listed company net -income totaled SR25.5 billion...

...resulting in a 17 percent decline year-on-year. 14 out of 19 sectors saw minimal change or losses in net income on a yearly basis. On the other hand, Banks and Materials saw the largest yearly rise in profitability...

....which led both these sector's contribution to overall profitability rising to 84 percent in Q1 2018.
